QuarterHorse

25 Watt Microamp

DH25H

**It has everything you'll need in an amp,
except the weight!**

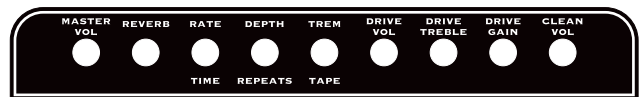

The completely unique QuarterHorse Stompbox Amplifier is a true two-channel 25-watt guitar amplifier in an ultra-compact pedal format.

Perfect for rehearsals, small gigs, recording and convenient practice, the QuarterHorse amp delivers a full, uncompromised feature set in a package that literally can ride to the gig in the pocket of any standard guitar case or gig bag.

Two channel design delivers clean and lead tones. Channel controls include Clean Volume, Drive Gain, Drive Treble, Drive Volume. Micro-toggle switch selects either tape delay or tremolo effects with both effects having full control. Three integrated footswitches allow quick one-touch channel select, effect bypass or reverb bypass.

Standard 1/4-inch phone jack output allows simple direct connection to any typical 8-ohm guitar cabinet. Additional 1/8th-inch output TRS headphone jack doubles as stereo line out for recording or private practice.
